**Germany and Turkey changed encryption Strategy**

Decoding of German encryption codes during II world war was the reason change encryption method in signs (arabic, greek, islam, colour, symbols, architecture, Street names, building names, place names, written and speech. Millitary use neural network copy and paste artıficial intelligence method and algorithm with word and sentece destruction and combination and coupling methods. Germany and Terror groups hide target and strategy in mixed names words and sentences with different content as usual, therefore it is very importand to find the secret information between the Word, phrase and sentences.
